Space Exploration Walkthrough

The following commands must be followed in conjunction with the map in order to win.

1. go south
2. get antenna
3. go north
4. go north
5. go west
6. get powercell
7. go east
8. go north
9. Repair
10. Go south
11. Go south

Step explained more clearly:

The player starts at base, then they must go to the storage and pick up the antenna, then the player must go to the Reactor, then pick up the powercell, then the player must go to the nose cone and use the repair command, then the spaceship is fixed. Then the player must return to base. After returning to base the player has won the game.
